

# PARKER PENS IN COLOR

## "Ivorine"

*A practical and beautiful novelty in fountain pens—*

On this page are shown the most beautiful innovations in the fountain pen line ever offered to the buying public. Instead of the conventional black, it is now possible to obtain Parker Pens with barrels and caps of beautiful colors—Turquoise blue, Jade green, Coral tint, Slate gray, a deep Violet and Crimson.

These are called the *Ivorine* Parker Pens. Ivorine is a substance manufactured abroad making possible beautiful effects in colorification. These pens appeal particularly to women as they match with costumes and hand bags and stationery sets and give a note of distinction unusual in fountain pens.

On the back of this sheet are illustrated other models of Parker Pens. We call attention to the Bakelite models—the pens with transparent barrels, through which the ink supply is always visible. Bakelite is tough and non-inflammable. These pens are obviously practical, eliminating the annoyance of running dry unexpectedly.

Ivorine with nickel clip. No. 20, \$3.75; No. 23, \$4.25. With gold clip, No. 20, \$4.25; No. 23, \$4.75
